Fairfield County Announces Third Annual Engineering Technology Summer Camp

Lancaster, Ohio – The Fairfield 33 Alliance will host its third annual Engineering Technology Summer Camp from June 24-28 and July 8-12 for students entering eighth and ninth grades. The camp will be held at Ohio University Lancaster’s Engineering Technology lab and is open to students who will be enrolled at a Fairfield County school or are home-schooled and reside in Fairfield County. There is no cost to attend the camp.

In its third year the camp will expand to involve even more students. The first two years saw a combined 45 students graduate the camp. The goal for this year is to provide smaller classes and maintain the focus on junior high students with an attendance goal of 30 students.

The 33 Alliance again will partner with Ohio University Lancaster and Lancaster City Schools to show students interested in Science, Technology, Engineering, and Math (STEM) how products evolve from concept to reality. Gina Orr, instructor at Ohio University Lancaster’s Engineering Technology Lab, and Angela Hoy, STEM teacher for Lancaster City Schools will again facilitate the camp.

“It’s amazing to see how excited these students get when they attend this program,” said Gina Orr. “On the first day they’re a little hesitant because they don’t know what to expect. But once they start making things their eyes light up and they can’t wait to get back in the lab. My favorite day is the last day of the camp when the students get to present what they’ve learned to parents and community leaders.”

The goal of the camp is to show students the rewarding careers that local manufacturers provide. Manufacturing jobs offer the highest wages on average in the county, with an average wage of \$58,000 per year according to the Department of Labor’s Labor Market Information. While most of the time in the class is spent making things, students also get to see local manufacturers like Midwest Fabricating, Company Wrench, and niFco.

“Gina has developed a program that is fun and educational while Angela really understands how to inspire these students,” said Rick Szabrak, Fairfield County Economic and Workforce Development Director. “Last year a student told their mom that she should quit her job and go work in manufacturing. It’s starting to change views on manufacturing careers and that’s important for our community.”

For more information or to apply for the camp, go to Fairfield33.com or contact Rick Szabrak at Rick.Szabrak@FairfieldCountyOhio.gov or 740-652-7160. A limited number of spots are available.
